INTERNSHIPS

MERN Stack – Gzoft | [Link](#) **2025**
Completed a full-stack internship at Zoyft where I developed responsive MERN-based web applications with secure REST APIs, user authentication, and MongoDB integration, contributing to both frontend (React.JS, Tailwind CSS) and backend (Node.js, Express.js) in an Agile environment using GitHub.

Web Development Intern – OctaNet | [Link](#) **2024**
Completed a Web Development Internship at OctaNet, where I gained hands-on experience in frontend development using HTML, JavaScript, and Tailwind CSS. Developed an understanding of clean UI/UX design principles and their impact on creating user-friendly and visually appealing websites.

PROJECTS

AI-Based Document Analyzer | [Demo Link](#) **2026**
This project is designed to analyze documents using Artificial Intelligence, NLP, and Machine Learning techniques. The system performs document analysis, text extraction, summarization, and intelligence processing using AI-Based models. It is smart document handling and prediction tasks.

Tech Stack: HTML, CSS, JS

Smart Dashboard Disaster Management System | [Demo Link](#) **2025**
The project features include historical and real-time disaster data analysis using Machine Learning techniques such as Linear Regression. The system is designed as a smart Dashboard Disaster Management Portal that uses Artificial Intelligence, Data Science, Machine Learning, and AI Agents to Predict disaster conditions, analyze affected areas, and provide intelligent support for decision-making.

Tech Stack: HTML, CSS, JS, AI, ML, DS, AI Agents

Hostel Management System | [Demo Link](#) **2024**
Developed a Hostel Management System on the MERN Stack with role-based access, complaint, registration, user authentication, admin dashboard, and RESTful APIs.

Tech Stack: JavaScript, Html, React, MongoDB.
