

EDUCATION

Sri Eshwar College of Engineering	B.Tech (AI&DS)	CGPA-8.23 (upto 5th sem)	2023-2027
Nirmala Matha Matric Hr Sec School	HSC	84.7%	2021-2023
Nirmala Matha Matric Hr Sec School	SSLC	PASS	2020-2021

INTERNSHIP

MERN – G- Zoft Tech Solutions 2025

Built scalable MERN stack web applications with a strong focus on responsive UI/UX and efficient real-time data handling. Experienced in full-stack development with integration of AI-driven features and cloud-based technologies.

Next-Gen Data Engineering – Build & Beyond 2025

Worked on designing and implementing scalable data pipelines and ETL workflows for efficient data processing and transformation. Gained hands-on experience with data engineering tools and cloud-based architectures.

Web Development Intern – Octanet Services Pvt.Ltd 2024

Worked on developing responsive and user-friendly web applications, gaining hands-on experience with front-end and back-end technologies, while enhancing problem-solving skills through real-world project tasks and collaborative remote work using industry-standard practices

PROJECTS

Personalized Government Scheme Recommendation System 2026

Developed an NLP-based government scheme recommendation system that analyzes user queries to provide personalized scheme suggestions. Supports multilingual input (including Tamil) with an interactive chatbot interface for easy access and filtering of schemes.

Tech Stacks : Python, Streamlit, spaCy/NLTK, Pandas, NLP Models

AI Surveillance Software for National Security Guard 2025

Designed an AI-driven surveillance system for the National Security Guard using Machine Learning and Computer Vision to analyze live video feeds. Automated detection of weapons, loitering, and abnormal behavior for real-time threat monitoring. Built with React and Node.js to enable rapid threat identification and accurate suspect localization.

Tech Stacks : Machine Learning, Computer Vision, React, Node.js

RFID-Based Reusable Packaging Tracking System 2025

Designed an RFID-based reusable packaging tracking system using RFID, Firebase, React, and Node.js to monitor box usage count and lifecycle status in real time. Developed a dashboard to track packaging movement and provide clear visibility into reuse cycles. Enabled industries to improve traceability, optimize reuse decisions, and enhance sustainability.

Tech Stacks : RFID, Firebase, React, Node.js

CERTIFICATIONS

Java (Basic) HackerRank	2025
Python Matplotlib Great Learning	2024
SQL (Basic) HackerRank	2024
Excel for Data Analyst Udemy	2024
C for Beginners Great Learning	2023

ACHIEVEMENTS

Smart India Hackathon Finalist 2025

Ranked among the top 10 teams in **Sathakathon** (Mohamed Sathak A. J. College of Engineering). 2025

Top 4 in **SAKTHI HACKATHON 1.0** at Dr Mahalingam College of Engineering & Technology 2025

CODING PROFILES

Leetcode : Solved 100+ problems | **Contest Rating :** 1,472 | [link](#)

Skilrack : Solved 250+ problems | [link](#)

SKILLS

Programming - C++ | Java (Basics)

Core Concepts - DSA | DBMS | OOP | RESTAPI

Database - MySQL | MongoDB

Data Libraries & Data Visualization - Pandas | NumPy | Scikit Learn | Matplotlib | Seaborn | Power BI

Tools - VSCode | Canva | Excel | PowerPoint | Postman | Power BI | GitHub | Tableau | Figma
