

EDUCATION

Sri Eshwar College of Engineering B.Tech	(AI&DS)	7.5 (till 5th Sem)	2023 - 2027
Shree Saraswathi Vidhyaah Mandheer School	HSE	75.0 %	2021 - 2023
Shree Saraswathi Vidhyaah Mandheer School	SSLC	83.1%	2020 - 2021

INTERNSHIPS

MERN Stack – GZoft 2024
Completed hands-on full-stack development training using the MERN stack (MongoDB, Express.js, React.js, Node.js), building responsive and scalable web applications. Developed RESTful APIs, optimized backend logic, and implemented efficient database operations. Collaborated in an agile environment with senior developers, following industry best practices and delivering production-ready features.

Data Engineering Intern 2025
Gained real-time, hands-on experience in data engineering workflows using SQL, Hadoop, Apache Spark, and Ubuntu/Linux environments. Designed and executed data ingestion, transformation, and querying pipelines on large datasets. Worked with distributed systems concepts to optimize data processing performance and ensure data reliability in production-like setups.

PROJECTS

Campus Connect – Smart Event & Attendance Management Platform | Flutter & Firebase 2024
Designed and developed a scalable Flutter–Firebase mobile application to centralize campus events, enabling seamless student access and engagement. Implemented real-time OD approval and attendance tracking systems for faculty using Firebase Authentication and Cloud Firestore synchronization. Delivered a high-performance, responsive UI with clean architecture, secure API integrations, and optimized data flow aligned with industry-standard Flutter development practices.
Tech Stack: Flutter, Firebase Authentication, Cloud Firestore, Google OAuth, REST APIs

Beyond Barriers – Inclusive Assistive Learning Platform | Flutter & Firebase 2025
Engineered an accessible, scalable Flutter–Firebase application tailored for deaf, mute, and visually impaired learners, integrating voice-based navigation, gesture controls, and sign-language support. Designed custom datasets, responsive UI components, and a clean, modular architecture following modern state management and clean code principles. Implemented core features, API-driven workflows, and Git-based collaborative development, with final system integration in progress.
Tech Stack & Tools: Flutter (Mobile Development), Express.js (RESTful APIs), Firebase Firestore (NoSQL Database), Google Workspace API

MineLCA – Data-Driven Life Cycle Assessment for Linear & Circular Mining Systems | ML-Based Analysis 2025
Developed an end-to-end Life Cycle Assessment (LCA) framework for mining operations, analyzing both linear and circular economy models. Collected and curated primary datasets, performed data preprocessing, and applied machine learning models to evaluate environmental impact, resource efficiency, and sustainability metrics. Generated data-driven insights to compare operational efficiency and support sustainable decision-making in mining systems.
Tech Stack: Python, Pandas, NumPy, Scikit-learn, SQL, React.js, Jupyter Notebook, Matplotlib, Seaborn

CERTIFICATIONS

Completed C Programming course on Simplilearn	Simplilearn	2023
Completed Master in Data Structures and Algorithms using C++	Udemy	2024
Completed Python for Artificial Intelligence course on Udemy	Udemy	2024
Earned Real-time Industry Experience Certificate through a Forage Virtual Internship	Forage	2025
Completed Data Science and Machine Learning Bootcamp with R course	Udemy	2025

ACHIEVEMENTS

LeetCode: Rank 225,466 | Problems Solved 400+ | Contest Rating 1,566 | [Profile](#)

CodeChef: Rank — | Solved 10+ Problems | 1+ Contest Attempted | [Profile](#)

HackerRank: Hackos 1219 | 3+ Certifications | 100+ Problems Solved | [Profile](#)

- Runner-Up – Project Presentation Competition, Sri Eshwar College of Engineering
- Best Student Innovator Award – Sri Eshwar College of Engineering, for outstanding creativity and innovation
- Runner-Up – Project Expo, Sri Eshwar College of Engineering (2023)
- First Place – Slide Scrapers Paper Presentation, Bannari Amman Institute of Technology
- National Finalist – Smart India Hackathon, selected among 270+ teams nationwide

SKILLS

Languages - Dart, Java, C, C++, Python, JavaScript, SQL, MongoDB, HTML, CSS, R
Core - Flutter Development, Mobile App Development, DSA, OOP, REST APIs, Firebase, OS
Framework & Library - Flutter, Firebase, React, Node.js, Django, TensorFlow, OpenCV
Tools - Git/GitHub, VS Code, Android Studio, Jira, PyCharm, Power BI, Tableau, AI Tools
